Marilyn Sibley, 585-723-1026,
marilynsibley@yahoo.com

- Complications of scleroderma typically include some or all of the following: extreme sensitivity to cold in extremities, hand deformity and facial changes, difficulty swallowing and digesting food, and profound fatigue and pain.
- There are an estimated 29,000 cases of scleroderma throughout the Tri-State, Inc. Chapter and 300,000 in the United States.
- Misdiagnosis is common. It can take one year or more for an individual to be diagnosed and receive appropriate treatment.

Special Attention

If you would like to receive a postcard reminder before each support group meeting please call 800-867-0885 and let us know so we can put you on the list.

**** OR ****

To help save money and time, and keep us green, send an email with your email address to *sdtristate@scleroderma.org* so we can put you on our email reminder list.
