

## 1996 Grants

Investigator	Institution	Project Title	Grant Duration	Amt Granted
Frank Arnett, M.D.	University of Houston Houston, Texas	Candidate genes for susceptibility to systemic sclerosis in Choctaw Native Americans	One Year	\$34,994
Stephen Clark, M.D.	VA Medical Center Newington, Conn	Analysis of the tight skin-2 mutation in an immune deficient mouse	One Year	\$34,930
Barry Gruber, M.D.	SUNY at Stony Brook Stony Brook, N.Y.	Determining the mechanism of action for pirfenidone: a new antifibrotic agent for treatment of systemic sclerosis	One Year	\$35,000
J. Lee Nelson, M.D.	Fred Hutchinson Cancer Center Seattle, Wash.	HLA alloantigens, pregnancy, and risk of scleroderma	One Year	\$35,000
David Strehlow, Ph.D.	Boston University Medical Center Boston, Mass.	Genetic markers for hypoxia using differential display	One Year	\$35,000
Maria Trojanowska, M.D.	Medical University of South Carolina Charleston, S.C.	TGF-B Receptor signaling in fibrosis	One Year	\$35,000
David Wyler, M.D.	New England Medical Center Boston, Mass.	Regulation of fibrosin expression in scleroderma fibroblast activation. I cloning and analysis of human fibrosin gene	One Year	\$35,000
			Total Granted 1996:	\$244,924

All grants collaboratively funded by the Scleroderma Federation and the United Scleroderma Foundation.
