Scleroderma is an autoimmune disease that’s so rare, spell-check doesn’t even recognize it. And because of a lack of awareness and the funds for research, sometimes doctors don’t recognize it either.

The Scleroderma Foundation Michigan Chapter is on a mission to bring awareness to scleroderma and make a difference in the lives of patients and the community. Our chapter is among the nation’s most aggressive and dynamic chapters, having recently been recognized regionally and nationally for our awareness efforts.

As part of our mission, we host monthly support groups around the state of Michigan. The groups are for scleroderma patients, friends and families, and cover a wide range of topics. We hope you’ll join us at a support group near you.
